

The Magic Window

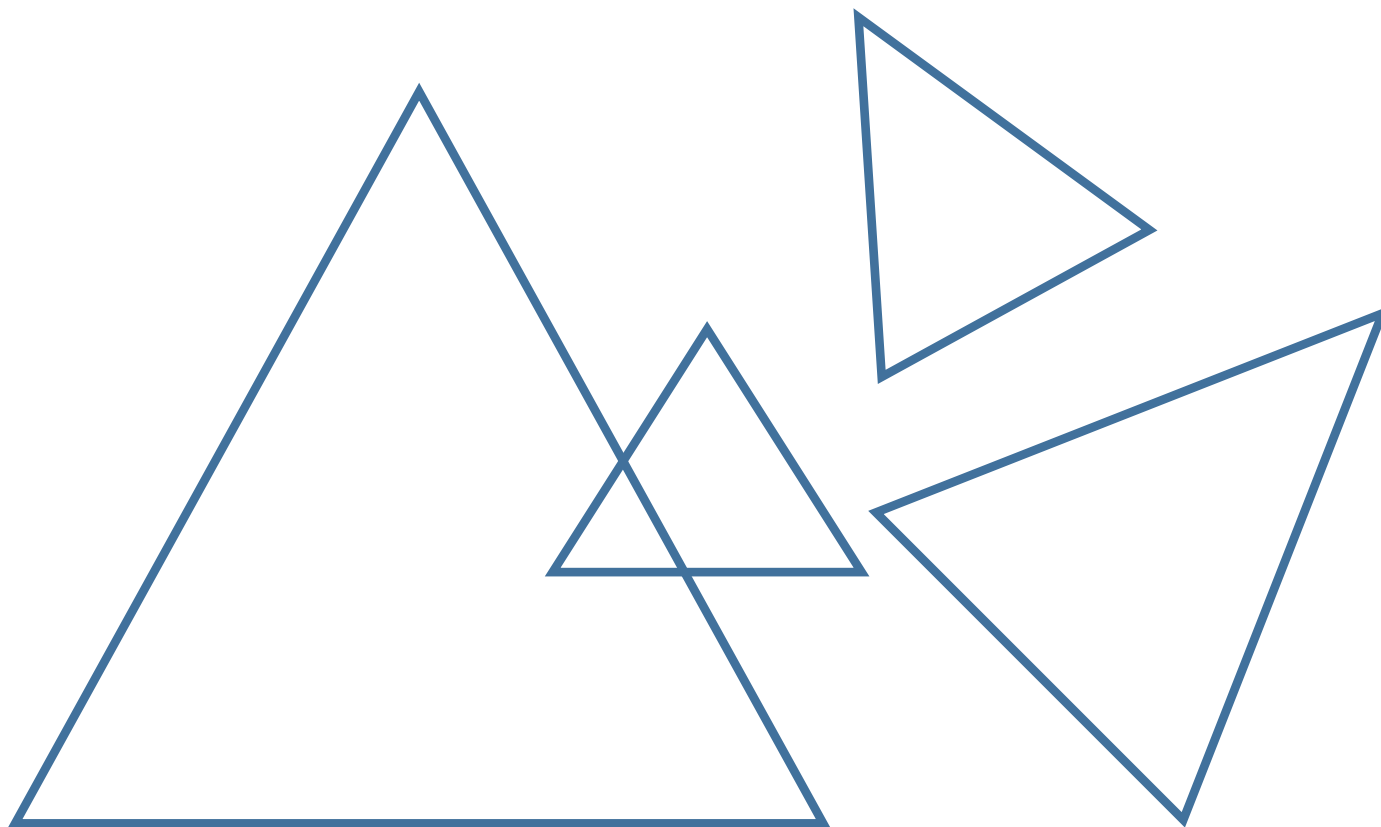

Our house has a magic window
that is always closed!

But we learnt to open bits of it
using shapes.

Let's start with a triangle

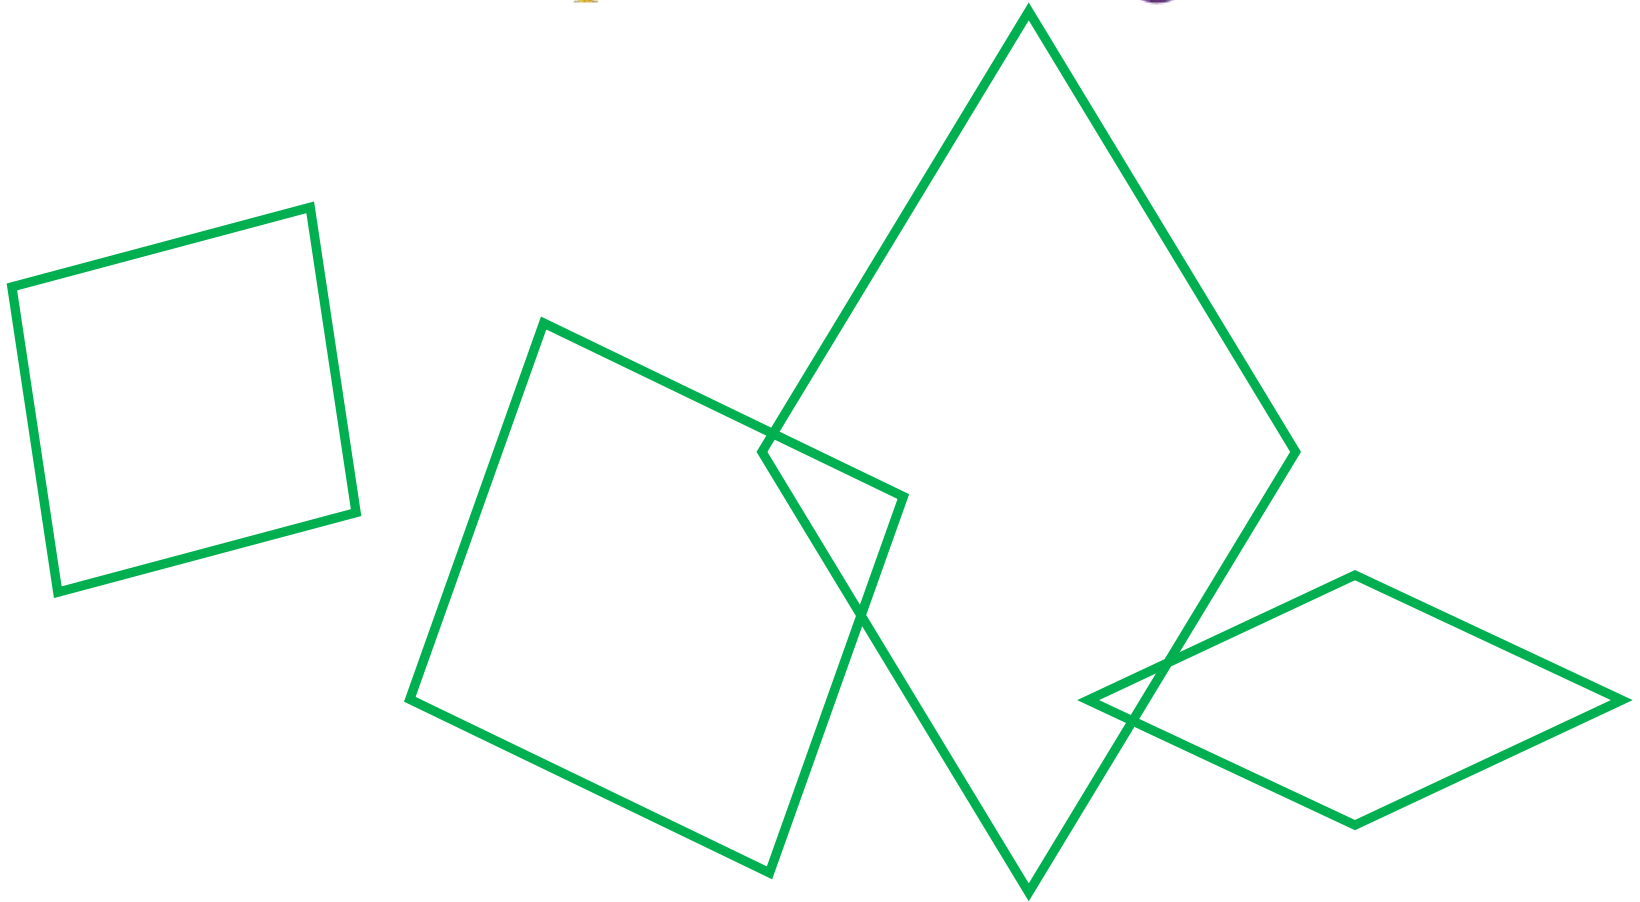

Through the triangle I can see
some food on a table....

...but not much more.

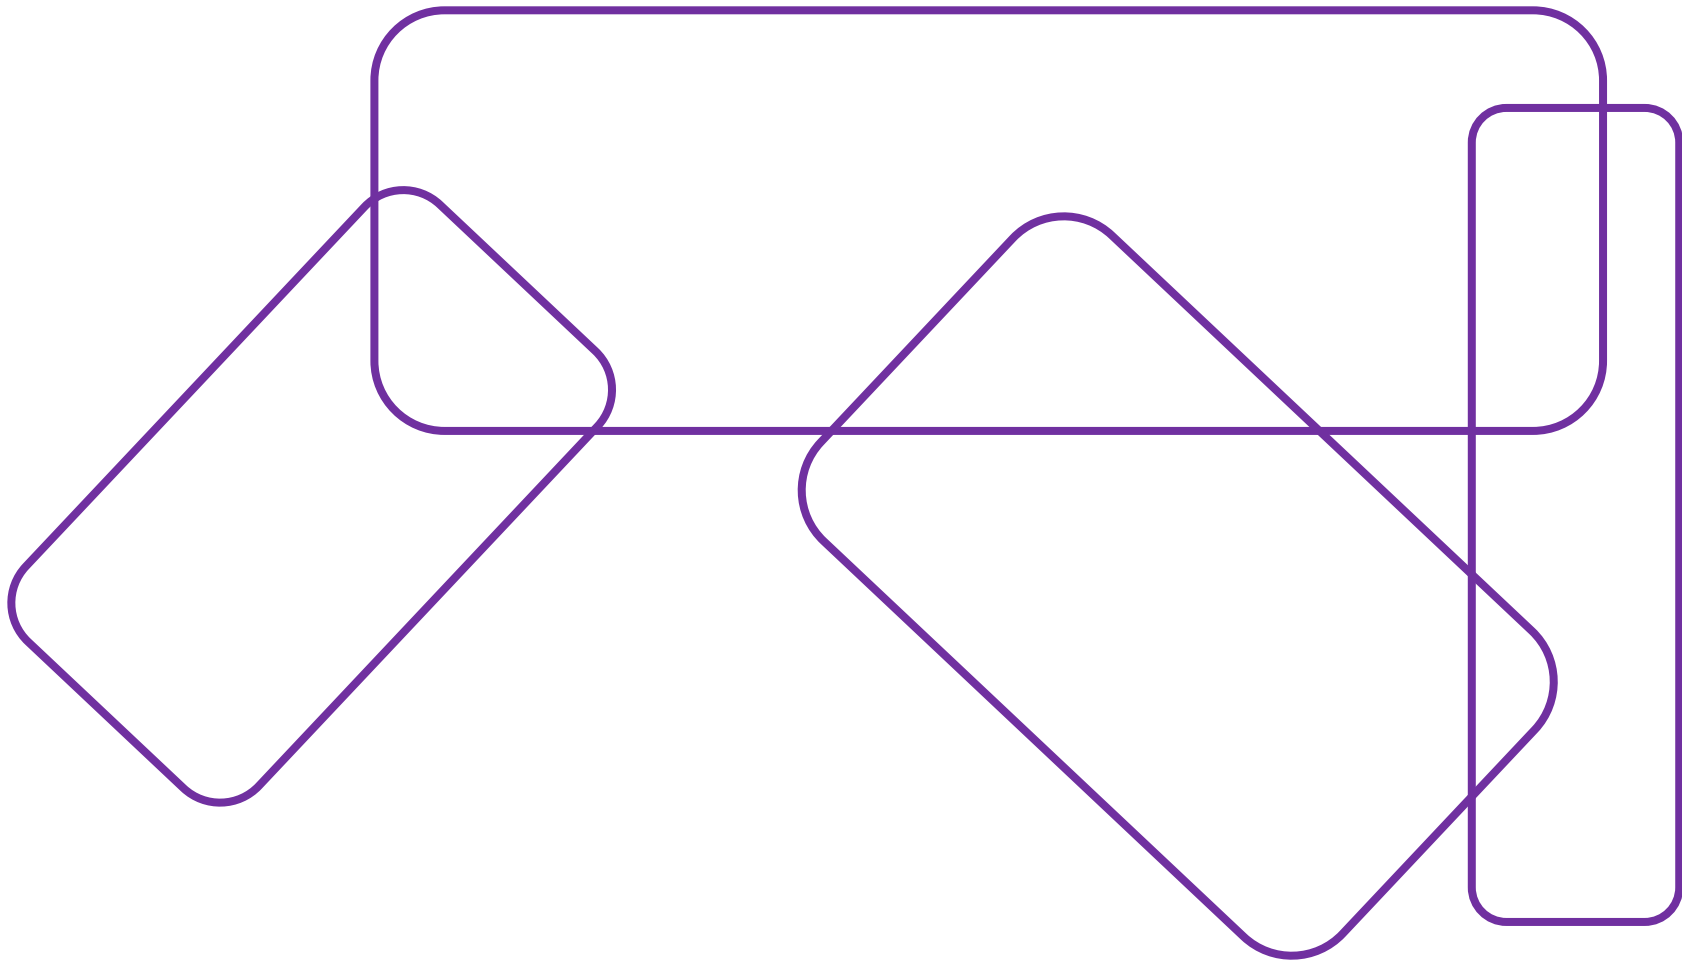

Let's try a diamond shape next
on top of the triangle

I can see Nanna.....

A rectangle next....
...near the top of the window

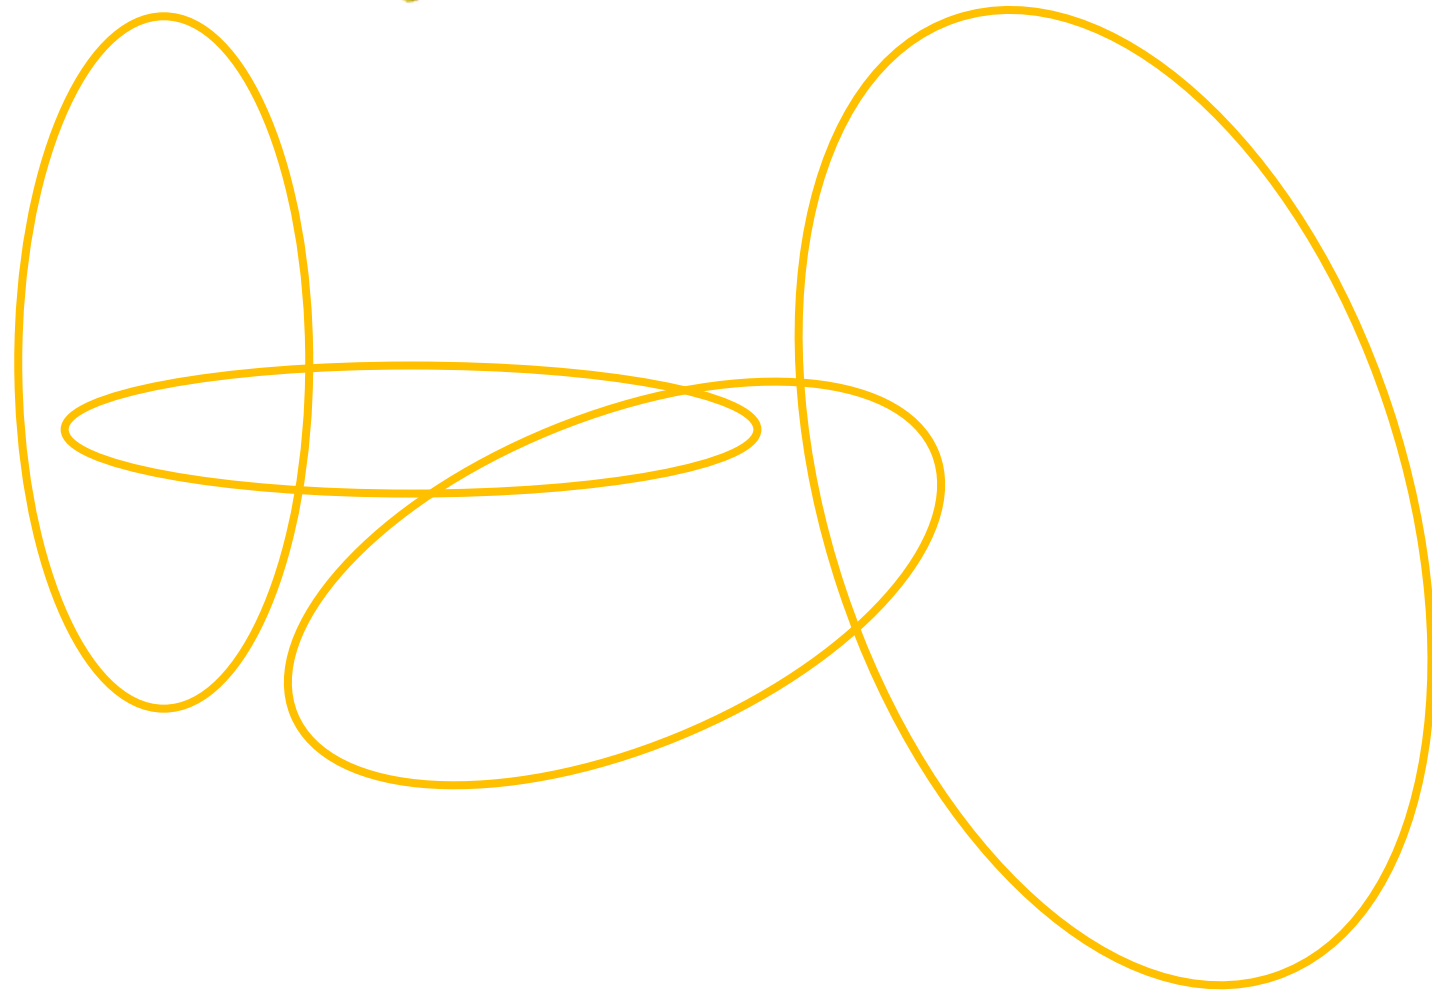

A bit of sky....
...and some trees

An ellipse is a lovely shape....
...let's try one in the middle

A lot of people...
...eating!

A little star next....
...somewhere

A little girl...
...smiling!

I see lots of people...
...and lots of food...

I wonder what they are doing...

Let's open the window and look

They are having a party!
